

Mobile Medical Medical Cart Manufacturer

In Partnership with:

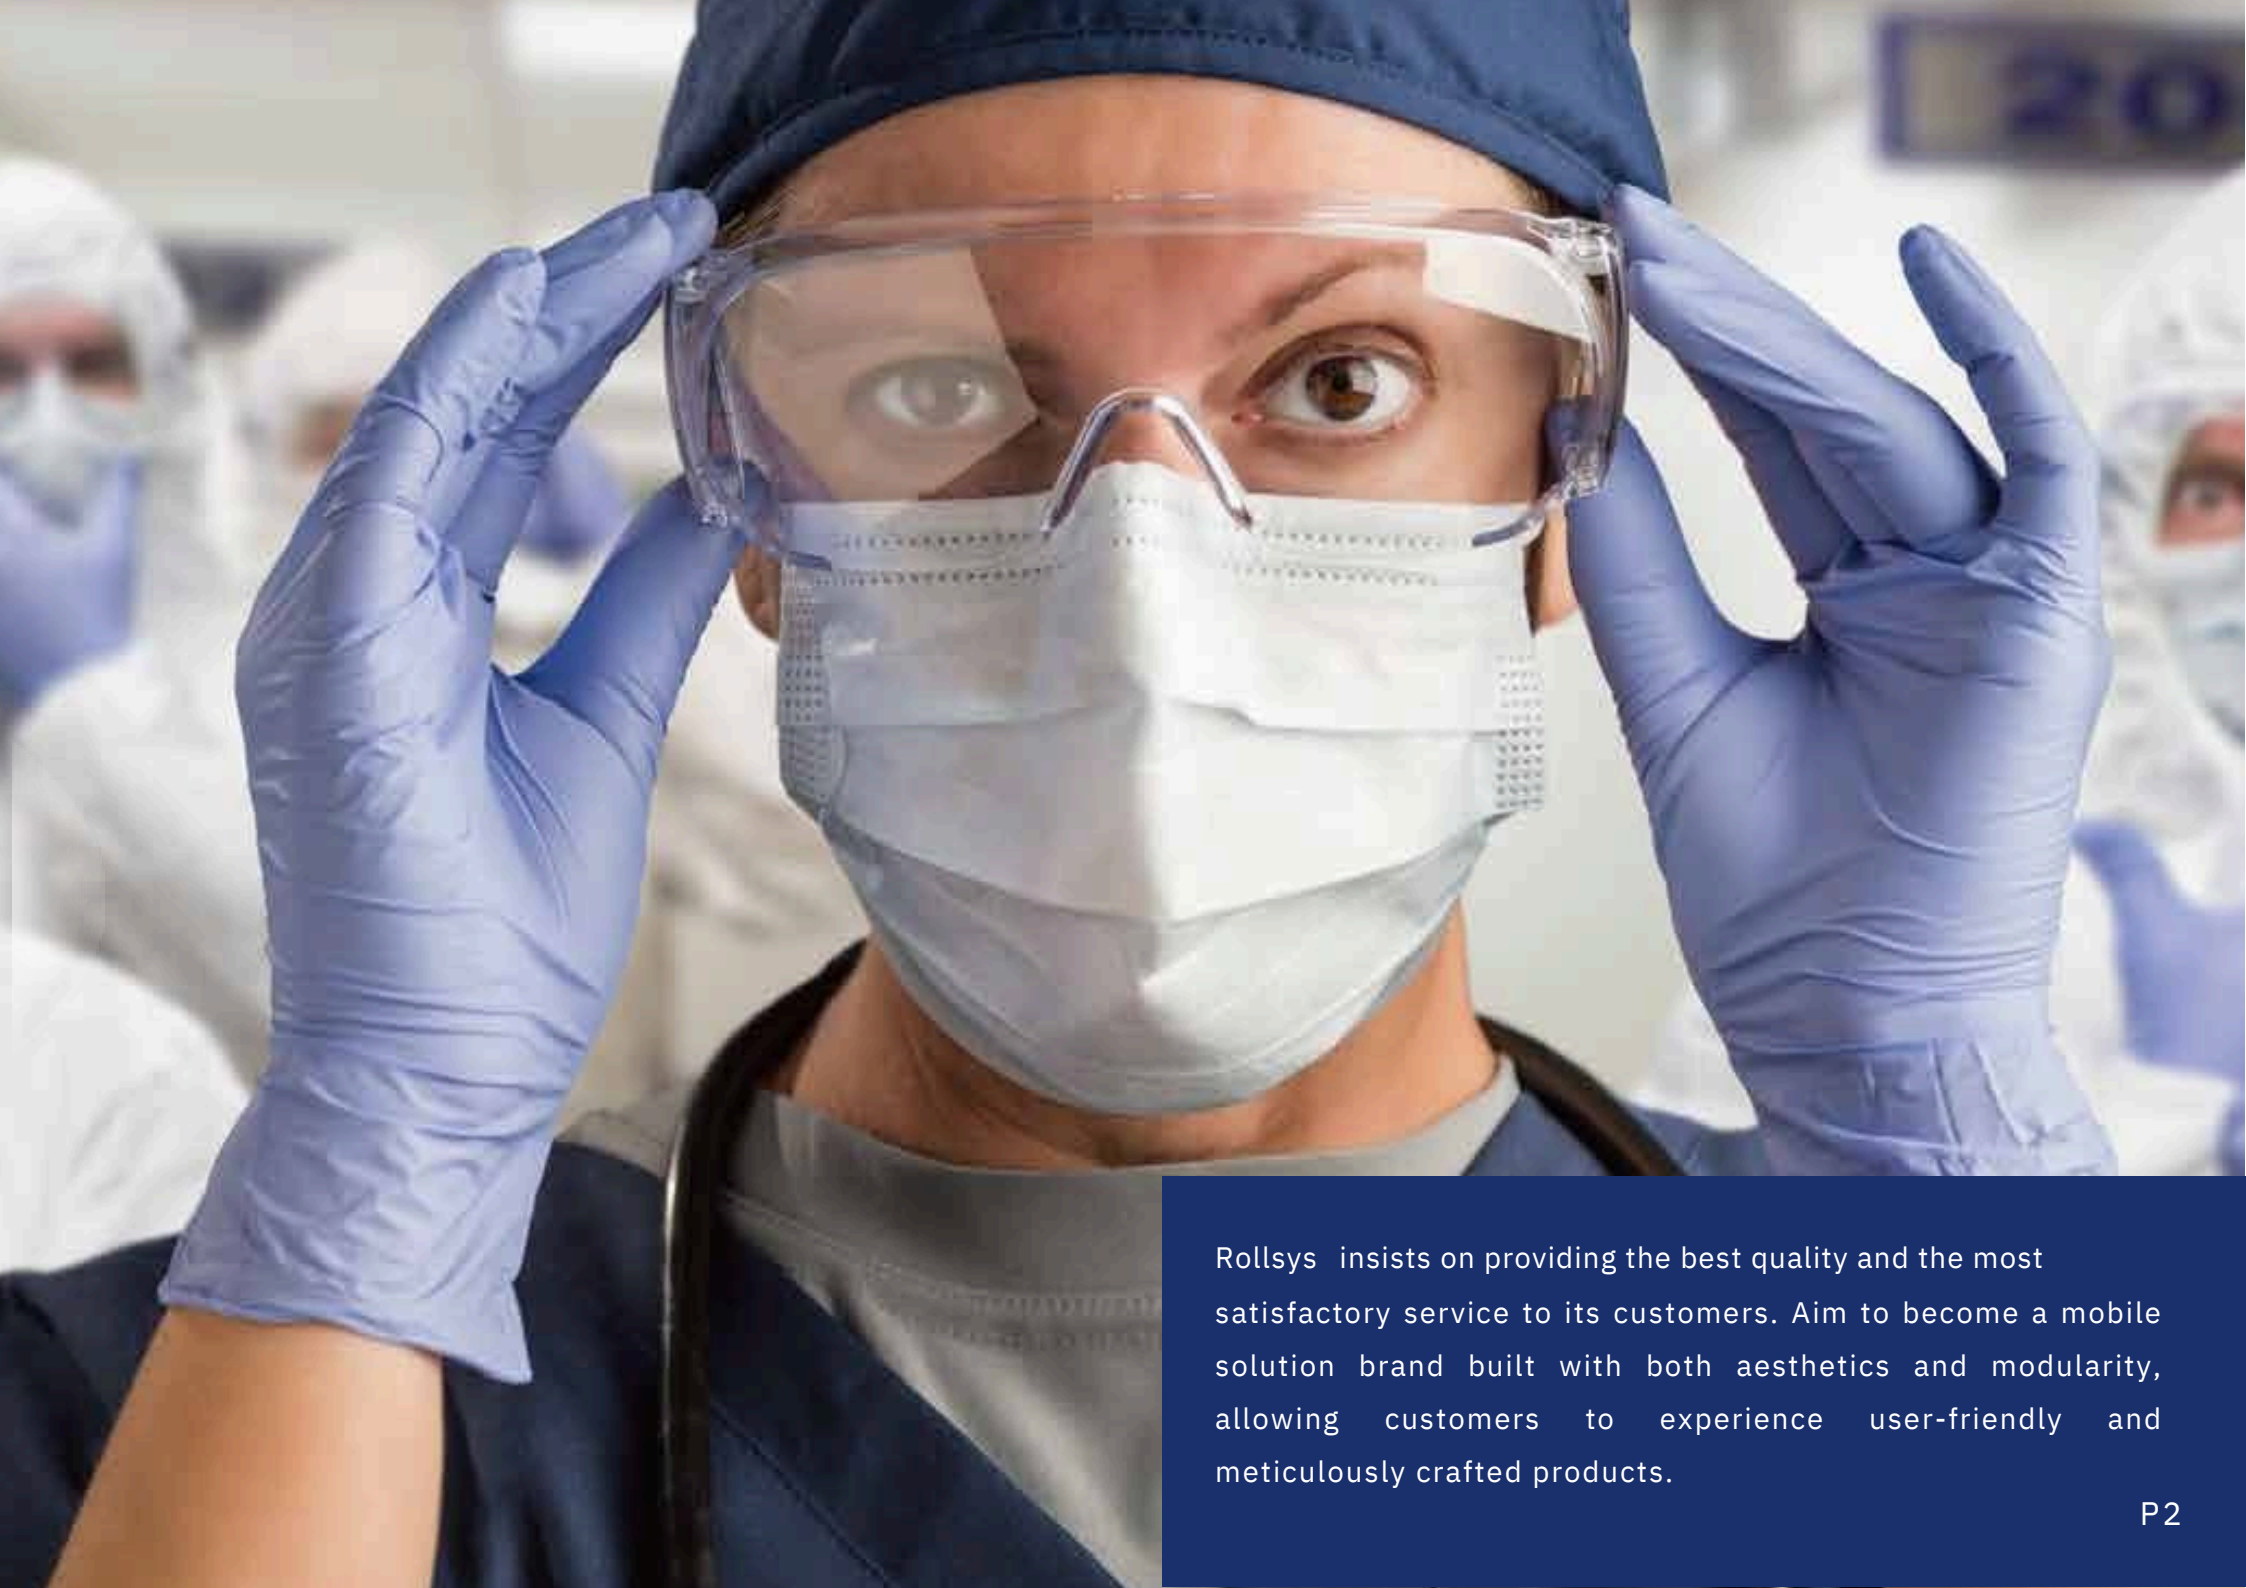

ESL

OUR VISION

“

FOCUS ON PROVIDING MOBILE SOLUTIONS TO EACH CUSTOMER AND BECOMING A RELIABLE PARTNER AND ONE OF THE LEADING BRANDS OF GLOBAL MEDICAL CART MARKET.”

Rollsys insists on providing the best quality and the most satisfactory service to its customers. Aim to become a mobile solution brand built with both aesthetics and modularity, allowing customers to experience user-friendly and meticulously crafted products.

ABOUT US

Integrated with 45 years of OEM experience and the resources from the parent company, Better Enterprise, the brand Rollsys is established to provide mobile solutions to the medium and high-end medical cart market. Rollsys provides modularized and customized designs, and is also in pursuit of providing high quality product and customer experience.

**PROFESSIONAL
MEDICAL CART
MANUFACTURER**

**WIDE SELECTIONS

MOBILE EQUIPMENT CART

Rollsys' Mobile Equipment Cart can be shaped into different form to meet different function of hospital departments. The design of the column can accommodate many kinds of accessories to transform the cart to different functions, such as Computer Carts, EEG carts, and even carts for ECMO system. Below presents an overview of optional accessories and helps you configure your ideal Mobile Equipment Cart.

CAN BE MULTI PURPOSE WITH MODULAR DESIGN

Regular Equipment Cart

Equipped with shelves for medical devices. The base is able to carry counter weight or a battery holder underneath if necessary.

Mobile Workstation

Equipped with a shelf for keyboard, and drawers for storage. The configuration can be changed to fit the needs of users.

ECMO Cart

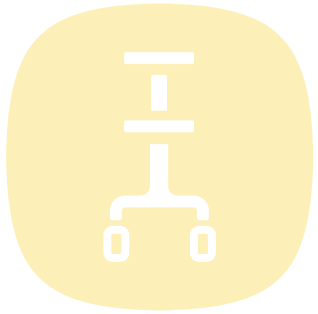

Equipped with an oxygen cylinder holder and IV poles. There are additional rails and pole can install centrifugal pumps, gas blender, and blood monitor. The base is able to carry the heater/ chiller on top and a battery holder underneath.

EEG cart

Larger shelf available for larger equipment. With rails added at the back of the cart, the arms for the amplifier and patient cable can be installed. There is also an extension pole for the camera.

MOBILE EQUIPMENT CART

Modular Design Concept

Rollsys designed each parts and accessories to be interchangeable, maximizing the product variety.

ENDOSCOPE CART

Rollsys' Endoscope Carts are designed to move the endoscopic equipment to the places in need.

ULTRASOUND CART

Rollsys' ultrasound cart is designed to fit most kinds of portable ultrasound equipment and provide mobility and improve work efficiency.

With the modular design of each part and accessory, we are able to build cart to fit the ultrasound equipment used in different divisions in the hospital.

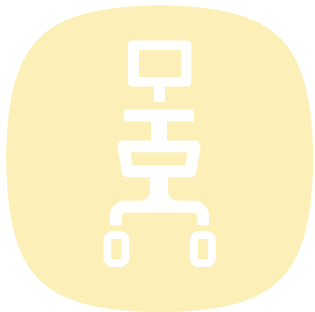

PRODUCT FEATURES

The tabletop of Ultrasound Cart is made with tracks on both sides, allowing users to adjust the probe holders to the convenient position or add other accessory holders if needed. One table can add up to 5 probe holders and 1 gel bottle holder.

MEDICAL ROLL STAND

Rollsys' Roll Stand can be changed into various forms to accommodate all kinds of small medical devices for different hospital departments. The design of the accessories and customizable device mount can transform the roll stand for patient monitor, portable ultrasound, or air warming systems. Please refer to the next page for the accessories and parts available.

BASE:

Rollsys provides options of sizes and shapes in order to fit different equipment weight and healthcare environments.

MONITOR MOUNT:

Other than the regular equipment mount, Rollsys provides customized equipment mounts no matter large or small.

ACCESSORIES:

Rollsys provides wide selections of accessories for storage, and holding attachments of medical equipment. Customized accessories/ holders can also be done if necessary.

SHELF & STORAGE

MULTIFUNCTIONAL MODULAR ACCESSORIES

Tabletop

Other than tabletop with metal texture, Rollsys® also provides wooden texture tabletop for more comfortable touch. A VESA mount can also be added to the table and make the cart a light workstation.

Laptop Security Bracket

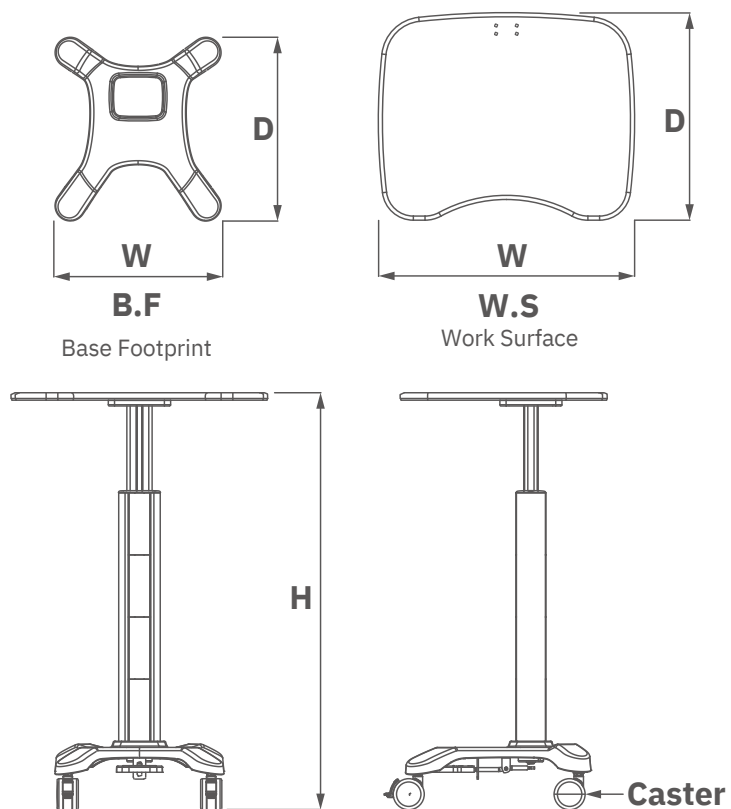

Optional laptop security bracket can also be added to prevent theft.

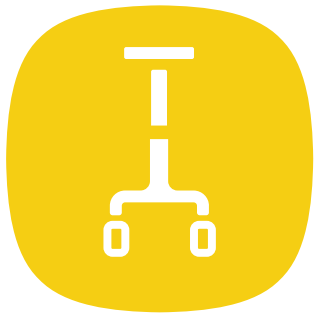

Tablet Holder

Rollsys provides two options for tablet holders, one for tablets smaller than 11", another one for tablets up to 13" large.

MRI COMPATIBLE CART

EC-002MRI

IMS-003CMRI

MRI Compatible models include many different carts and stands for the medical equipment needed in the MRI room. All components are non-magnetic and MRI-safe, specifically designed for the MRI environment. Here are some models that Rollsys have been supplying. To tailor an MRI cart please feel free to contact us for more options.

ECG-007MRI

RS-004MRI

IVS5-005MRI

MOUNTING SOLUTION

The mounting solution Rollsys provided is designed to help users move the monitor into multiple positions effortlessly with a light touch, lift, or swing.

Mounting Options

OVERBED TABLE

Designed for hospital patients to perform their tasks without having to get off the beds. Rollsys' Overbed Table can also have a monitor mount. By adding a touch-screen monitor or a tablet, patients are able to call for help, order meals, and enjoy entertainment on bed.

Similar to the Wall Mount series, users can easily maneuver monitor with light touch, the lift or swing. The monitor mount on the table can also be changed to a tablet holder.

The back of the monitor mount is equipped with cable management accessories, and can also be replaced with other accessories if needed.

TABLET HOLDER

With the advancement of imaging technology, the imaging system can be integrated into thinner and thinner monitors. To adapt to the change, Rollsys provides two different sizes of tablet holders to accommodate different sizes of medical tablets.

The Tablet Holders can be applied to either carts, roll stands, or wall mount, and are also equipped with locks to prevent theft.

Tablet Holder for 9 to 11 inch:

Suitable for tablet with thickness less than 1 cm.
The holder is able to rotate 360°.

Tablet Holder for 11 to 13 inch:

Suitable for tablet with thickness less than 1.2 cm.
The holder is able to mount on any 75 x 75 VESA mount.

OPERATING ROOM INTEGRATION SYSTEM CART

A transformation of Rollsys' Computer Cart. This cart is designed to support medical staff in the operating room by integrating the imaging, conference, and OR hardware (surgical table, ceiling mounted equipment, or C-arm) control into one cart.

COMPATIBLE BRAND DESIGN

Better Enterprise's R&D team is experienced in medical technology and has created various Medical Device Mounting Solutions for customers from different healthcare industry.

Our products are designed with durability and stability to ensure safe and reliable in your work places.
